Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 7,8,10 are rejected under 35 U.S.C. 102(e) as being anticipated by Parker et al (6,712,481).

3. Parker discloses a light guide plate made of a plate like, light transmitting material and having a bottom side that comprises a plurality of different kinds of reflection means that form a reflection surface; and an illuminating light source arranged opposite a light receiving side surface of the light guide plate wherein two of the reflection means meet at a smooth boundary that is free of any step (figs1-4a, col. 5 lines 49-67 and col. 6 lines 1-3,36-43,63-67); a first one of the reflection means is formed of textured undulations of a predetermined shape and a second one of the reflection means is formed of prisms (4a-4c); the plurality of different kinds of reflection means are disposed side by side on the bottom of the plate.

Allowable Subject Matter

4. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art cited does not specifically teach the prismatic reflection mean having an upslope that forms an angle relative to the first reflection means as recited by applicant.
